August 7, 1989

Mr. Darrell Newby
Newby-Proctor & Associates
P.O. Box 8040
Greenwood, SC 29646

Dear Darrell,

We appreciate your bid for the surveying of the Catawba, 60-D, and Rainsford tracts. To confirm our conversation of 2 August, we require at this time only these three tracts to be surveyed under the guidelines set forth in your bid. You can start on this job at your earliest convenience.

Some information which may be helpful to you has been enclosed:

1. Blueline topographic print of our aerial survey of the project area; and
2. A copy of the aerial photos used in the fly-over showing ground control.
(Circles: vertical control; and triangles: horizontal control points). On the back is pertinent information for the bench marks, which are surveyed to state plane coordinates.

If you have any questions on this matter, please contact me.

Regards,

Dave Halverson
Mine Engineer
